SKILLS

- ●●●○○ PHP
- ●●●● Java
- ●●●●○ Vue
- ●●●○○ Android Studio
- ●●●● Kotlin
- ●●●○○ C
- ●●●○○ Python
- ●●●○○ Spring Framework
- ●●●○○ API REST
- ●●●○○ JavaScript
- ●●●●
- ●●●○○ Banco de dados PostgreSQL, MySQL
- ●●●● Inglês fluente
- ●●●● Português nativo

SUMMARY

🔖 I work well in a team, I like to discuss better solutions for the projects being developed by the team, I have knowledge about creating API's with Java using Spring Boot and I have also developed websites using HTML, CSS, JavaScript and Android applications in Java.

PROFESSIONAL EXPERIENCE

DISCURSO VIRTUAL - PT
https://www.dv-ti.com/ - 2023 - 2024

- Discurso Virtual is a Portuguese company specialized in management and billing software such as PHC and Sage. It also carries out software programming for its customers on demand. Most projects are made in Vue 3 and PHP.

IOTAG - BR
https://www.iotag.com.br - 2022

- IOTAG is a Brazilian startup that has been revolutionizing the market with its telemetry devices for agribusiness machinery. My main functions at the beginning of our partnership were to act as a front-end developer working in the maintenance of web platforms using the VUE.js framework. A second challenge embraced by me was the maintenance and development of new functionalities in the mobile application. I developed new skills in Android Studio and Java

PROJECTS

DS Catalog
https://github.com/martinsrvinicius/dscatalog-myfirst

- Bootcamp Spring Boot Java. System using best practices with DTO, Web Services REST, complet CRUD, Exceptions treatment, JUnit Tests with Mockito and MockBean, Bean Validation with OAuth2 and JWT.

VINICIUS-DEV
https://vinicius-dev.vercel.app/

- Website with portfolios and skills created in Vue 3 and deployed in Vercel at: https://vinicius-dev.vercel.app/

ROSEMERI BEAUTY
https://rosemeri-beauty.vinim.eu/

- System built in Vue and PHP that allows scheduling, confirmation of appointments and cancellation of beauty services.

DSmovie
https://github.com/**martinsrvinicius/dsmove**

- Web application that displays movies and their main information. The user can evaluate, register an e-mail and view the average grade of each film. We used Java with Springboot on the back end and TypeScript with ReactJS on the front end.

MyFood
https://github.com/**martinsrvinicius**/myFood

- Application made in Android Studio in Kotlin language reproducing the main elements of the main screen interface of the famous "IFood" application that displays different dynamic and static visual elements simulating navigation in the original application.

WebServices REST
https://github.com/martinsrvinicius/dsbootcamp-vrmclient

- Backend project built on Spring Boot and GIT monorepo. The project was layered with REST controllers, services, and data access. Test environment was set up, DTO standard for request response, complete CRUD implementation, exception handling, audit data and data paging.

ACADEMIC RECORD

Universidade Internacional - UNINTER
Bachelor of Software Engineering (2022 - 2025)

COURSES

Bootcamp Full Stack - DevSuperior (2022)

- Java with Spring Boot and ReactJS

Udemy - Prof. Nélio Alves

- Complete Java, Object Oriented Programming, Programming Algorithm and Logic, C Language and Python.

Udemy - Conexão Agile - Prof. Júlia Mesquita

- The Scrum fundamentals

Curso em Vídeo - Prof. Gustavo Guanabara

- Javascript, MySQL database
